ABOUT

An enthusiastic and dedicated person who has developed a mature and responsible approach to any task that undertaken. Eager to gain experience in the tech industry and always open to mentorship and continuous learning. Seeking a corporate environment to expand knowledge in software and hardware development, improve technical skills, and apply existing knowledge while adapting effectively to team-oriented work environment.

PROJECTS

Rubik's Cube Solver (January 2024)

- Designed and developed the user interface for a Rubik's Cube Solver using Python
- Designed a software solution that effectively solves a Rubik's Cube

Copy of Disney+ Website (November 2024)

- Developed a responsive front-end replica of the Disney+ website using HTML and CSS, accurately recreating the layout, styling, and visual elements.

Copy of Netflix Website (November 2024)

- Developed a front-end replica of the Netflix homepage using HTML and CSS, replicating layout structure, styling, and hover interactions.

Copy of the Spotify Website (November 2024)

- Developed a responsive clone of the Spotify homepage using HTML and CSS, mimicking the original site's design, elements, typography and color scheme. Enhanced user experience by integrating audio feedback on click actions through JavaScript-driven interactions.

INTERNSHIP

MSD Godspeed Exhibits Corporate Website (February to May 2025)

- Developed a fully responsive corporate website ensuring optimal performance across devices.
- Designed interactive UI components using Tailwind CSS, including animations, galleries, and tab-based content sections.
- Integrated secure contact and inquiry forms with backend PHP processing and EmailJS API for real-time notifications.
- Implemented structured page navigation and modular PHP templates.
- Deployed the redesigned website to a live production hosting environment.
